INDEX FOR VOLUME 3

AUTHORS

Burt, Cyril, "The Unit Hierarchy and Its Properties," 151-168.

Buxton, Claude, "The Application of Multiple Factorial Methods to the Study of Motor Abilities," 85-93.

Di Michael, Salvatore (with Jack W. Dunlap), "An Abac for Determining the Mean Deviation of a Class from the General Mean," 41-44.

Dunlap, Jack W. (with Salvatore Di Michael), "An Abac for Determining the Mean Deviation of a Class from the General Mean," 41-44.

Gulliksen, Harold, (with Dael L. Wolfle), "A Theory of Learning and Transfer: I," 127-149.

Gulliksen, Harold (with Dael L. Wolfle), "A Theory of Learning and Transfer: II," 225-251.

Harman, Harry H. (with Karl J. Holzinger), "Comparison of Two Factorial Analyses," 45-60.

Harman, Harry H., "Extensions of Factorial Solutions," 75-84.

Holzinger, Karl J. (with Harry H. Harman), "Comparison of Two Factorial Analyses," 45-60.

Householder, A. S., "Conditioning Circuits," 273-289.

Householder, A. S. (with Gale Young), "Discussion of a Set of Points in Terms of Their Mutual Distances," 19-22.

Householder, A. S., "Excitation of a Chain of Neurones," 69-73.

Knott, Virginia (with C. H. McCloy and Eleanor Metheney), "A Comparison of the Thurstone Method of Multiple Factors with the Hotelling Method of Principal Components," 61-67.

Landahl, H. D., (A Contribution to the Mathematical Biophysics of Psychophysical Discrimination," 107-125.

Landahl, H. D., "Centroid Orthogonal Transformations," 219-223.

AUTHORS

Landahl, H. D., "Contribution to the Mathematical Biophysics of Error Elimination," 169-180.

Landahl, H. D., "The Relation Between the Intensity of Excitation and the Number of Neurones Traversed," 291-295.

Ledermann, Walter, "The Orthogonal Transformation of a Factorial Matrix Into Itself," 181-187.

Lynch, J. A., "A Quantitative Description of the Stimulus," 95-105.

McCloy, C. H. (with Eleanor Metheney and Virginia Knott), "A Comparison of the Thurstone Method of Multiple Factors with the Hotelling Method of Principal Components," 61-67.

Metheney, Eleanor (with C. H. McCloy and Virginia Knott), "A Comparison of the Thurstone Method of Multiple Factors with the Hotelling Method of Principal Components," 61-67.

Mosier, Charles I., "A Note on Dwyer: The Determination of the Factor Loadings of a Given Test," 297-299.

Rashevsky, N., "Contribution to the Mathematical Biophysics of Visual Perception with Special Reference to the Theory of Aesthetic Values of Geometrical Patterns," 253-271.

Thurstone, L. L., "A New Rotational Method in Factor Analysis," 199-218.

Thurstone, L. L., "The Perceptual Factor," 1-17.

Tucker, Ledyard R., "A Method for Finding the Inverse of a Matrix," 189-197.

Wilks, S. S., "Weighting Systems for Linear Functions of Correlated Variables When There Are No Dependent Variables," 23-40.

Wolfle, Dael L. (with Harold Gulliksen), "A Theory of Learning and Transfer: I," 127-149.

Wolfle, Dael L. (with Harold Gulliksen), "A Theory of Learning and Transfer: II," 225-251.

Young, Gale (with A. S. Householder), "Discussion of a Set of Points in Terms of Their Mutual Distances," 19-22.

TOPICS

Abacs and Nomographs, 41-44.

Biophysics, Mathematical, 69-73, 107-125, 169-180, 253-271, 273-289, 291-295.

Computational Methods, 23-40, 41-44, 189-198, 199-218, 219-223, 297-299.

Factor Analysis, 1-17, 45-60, 61-67, 75-84, 85-95.

Factor Theory, 1-17, 45-60, 61-67, 75-84, 151-168, 189-198, 199-218, 219-223, 297-299.

Learning, 95-105, 127-150, 169-180, 225-251.

Matrix Theory, 19-22, 151-168, 189-198, 199-218, 219-223.

Methods of Combining Variables, 23-40.

Psychophysics, 107-125.

Test Theory, 23-40.
